

BOSCHERT GIZELIS USA

ELECTROBEND®

ElectroBend delivers innovative power, speed and savings. The new ElectroBend line of servo electric press brakes bring higher productivity, better accuracy and more reliability through fast and safe machines. The ElectroBend uses 50% less energy than hydraulic models and has eliminated all hydraulic fluid – cutting costs associated with leaks, maintenance and disposal. Boschert-Gizelis brings more than 50 years of manufacturing experience to its innovative line of electric machines – featuring both the ElectroBend and the first-to-market ElectroCut shear series.

- ▶ Industry leading 2D control technology
- ▶ CNC crowning standard
- ▶ Extra daylight-24 inches
- ▶ Laser Safe IRIS system
- ▶ "O" frame design assures minimum frame deflection
- ▶ Intrinsically safe design and features
- ▶ Integrated tool cabinet with light and motorized door
- ▶ Industry 4.0-ready
- ▶ Quieter than hydraulic
- ▶ Compare our Costs!
