

The Boschert **USA team** is here for you.

From Milwaukee, Germany, France, Switzerland or Greece, we'll support your fabricating needs. We bring to North America five of the finest European machinery brands—for punching, bending, cutting, rolling or shearing. Our team will work with you to identify and build the specific machine to meet your exacting demands.

Upon completion, Boschert USA will support your delivery, installation and staff training. For service and parts, we are a resource for the lifetime of your machine. What sets Boschert USA apart is its long-term, multi-generational commitment to personal, professional and attentive support. We're here to help you shape your future.

Five Exceptional **Brands.** Outstanding **Service.** Valued **Resource.**

Known for technological evolution, precision and safety, Boschert machines increase efficiency and improve productivity. Boschert specializes in high quality, "state-of-the-art" fabrication tools, including notching, manual punching and CNC punching machines, and machines for copper bar processing.

For press brakes and shears that fulfill the most cutting-edge metalworking needs, fabricators are turning to Boschert-Gizelis. Committed to R&D, Gizelis is bringing innovations like the first electric shear and a powerful electric press brake to the rapidly evolving sheet metal industry.

Stierli-Bieger

Stierli has been the world leader in horizontal ram benders for more than 80 years. With the widest range of machines for bending and straightening, Stierli horizontal benders range from simple manually gauged machines to laser-guided CNC systems for bending and straightening.

Picot Three- and four-roll bending machines from AMB Picot will produce a wide variety of sheet metal formats into endless curved, round or conical shapes. Pair Picot's plate roll benders with its new AI-based EasyRoll® software, and bends become more intuitive and error-free.

PBT's profile bending machines—the best in the industry, meet the precision, quality and technical performance requirements of a wide range of customers and industries around the globe. PBT's proprietary CNC bending software also assures easy operation, precise bends and high repeatability.
