

A (Fiber Laser) Cut Above

Give Your Application A Hand

Boschert Flat Bed Fiber Lasers go beyond the standard configuration machine – for your unique production runs that allow operators to pull parts before cutting the entire sheet. Boschert uses less floor space, allows true just-in-time

parts scheduling, and delivers a better way of unloading laser-cut parts. With easy nozzle changes and IPG lasers cutting up to 15mm, Boschert Fiber Lasers are truly a cut above.
