

Two + Three = Savings

**Boschert TWIN/TRI
Punching Machines
Deliver More
Than Efficiency**

Why buy a 50-tool turret machine to do a three-function job?

Boschert's TWIN/TRI Series CNC Punching Machines' two or three independent punch heads combine versatility with efficiency—with zero tool-change times. With Revotool, Boschert's multi-tool solution, fabricators can apply up to 16 tools in the TWIN and up to 24 on the TRI Punching Machines—combining both punching capability and forming up to a 50-ton capacity. Boschert's powerful software also enables automatic repositioning and turning/flipping of large sheets to extend working capacity. Gain versatility and save with the Boschert TWIN/TRI Series.
