

Boschert-Gizelis Press Brakes: Raising the Bar

Francis and Company, an architectural wood and metal design company from Griffin, Georgia, is eliminating hand work, living with fewer errors with expensive materials, and working more efficiently—all with a recently installed Boschert-Gizelis G-Flex 3140 press brake with BG-Soft CNC software. Now challenging tailored bends in copper, stainless steel, brass and Muntz metal are easier and beautifully executed for bar rails, furnishings, table bases, countertop supports and architectural detailing in the hospitality, commercial and residential construction industries. Matched with a Boschert-Gizelis shear, Francis is producing stunning metal structures for its customers.
