

# Boschert-Gizelis G-Cut CNC

**Three Features:  
A Cut Above  
the Rest**

**Three reasons to choose the Boschert-Gizelis G-Cut CNC swing beam hydraulic shear:**

- 1. Return to Front** – Finished and appearance-sensitive pieces return to the operator instead of behind the machine. Reduces repetitive motion. Increases efficiency, productivity and safety.
- 2. Narrow Strip Cutting** – An unconventional approach to thin strip shearing eliminates waste and delivers a quality finished component nearly twist-free.
- 3. Auto Thickness Measurement** – A simple sensor measures material to optimize blade gap. Protects your blades. Eliminates guess work. Reduces waste and downtime from fold-over jams. Safer, easier, more efficient.

**BENDING, CUTTING & PUNCHING MACHINERY**
