

We're Flexible: Copper Bar Processing to Meet Every Need

Boschert USA offers copper bar processing machines from two integrated manufacturers—Boschert and Stierli. For all your copper bar punching, notching and bending needs, from simple to complex, both brands' machines are fully customizable to handle the intricacies of your unique job specifications – delivering reliability and precision every step of the way. Check out all of our machine options on our newly re-designed website: www.boschertusa.com
